

CABOOLTURE HOSPITAL REDEVELOPMENT PROJECT

CONSTRUCTION NOTIFICATION | MARCH 2022

Installation of permanent underground power supply

Construction of the new Clinical Service Building (CSB), which is part of the Caboolture Hospital Redevelopment Project, is continuing. The next stage of construction is to connect the new CSB to a permanent underground power supply from an existing Energex substation on Jensen Road, Caboolture (refer to map on following page).

The power supply will use existing underground Energex conduits and will involve underground investigations to confirm the location of the conduits, digging at existing pits along the alignment, and pulling new cables.

Footpath diversions and partial lane closures will be required at various points along the alignment to accommodate equipment and maintain safety for workers, pedestrians, and motorists. Traffic controllers will be in place to direct pedestrians and motorists safely around the work zones.

Works will commence at the McKean Street roundabout and move north along Pettigrew Street to the substation on Jensen Road. The installation is expected to commence from **Monday, 4 April** and will take approximately three months to complete (subject to weather and ground conditions). Please see map for alignment and locations of temporary work sites.

What to expect:

- Partial lane closures and footpath diversions at various locations on Pettigrew Street, Lindwall Street and Jensen Road. These changes are anticipated to be in place for two to three weeks before moving to the next location.
- All works will take place within road reserves with no access to private properties anticipated.
- Some on-street parking may be impacted temporarily.
- Traffic controllers safely directing pedestrians and vehicles through the work zones (where required).
- Reduced speed limits along Pettigrew Street, Lindwall Street and Jensen Road.
- Lendlease will make every effort to minimise construction impacts during these works.

For more information, or to subscribe to the project's email updates, please contact the Project Hotline on 1300 144 425 or email CabooltureHospital@lendlease.com. Scan the QR code to find out more about the Caboolture Hospital Redevelopment Project.

Thank you for your patience during these important works.

- Approximate alignment of underground permanent power supply
- Location of worksites progressively along the alignment
