

COVID-19 (Coronavirus)

Factsheet - Protect Youpla and Youpla Pamle!

Wanem COVID-19 (Coronavirus)?

This sick samekine olsem cold sick. This sick can start from lung and mekeh lung nugood. Sometimes you proper sick wuntime or some-time you nor sick until after (from 1 to 14 days).

How em spread?

COVID-19 e spread between people:

- Through cough or sneeze (untap you)
- When somebody whotha sick e cough or sneeze untap something and you gor tasseh the same thing (olsem door handle) and then you rub you face or when you kaikai.

Wiskind you can protect yourself, you pamle and you community?

Wash hands every time:

- Before kaikai
- After hugging pamle
- After tasseh people
- After tasseh anything
- After gor toilet
- Because e can spread from hand gor for your mouth, nose and eyes when you tasseh your face
- Avoid hand shake at all times lor people
- stap good distance from one another (1.5m)
- stap haus unless you gor shop por buy kaikai or gor doctor

E mina important por look after yourself and keep your body strong.

- Kaikai proper and nor piget por exercise
- Make sure you gud good sleep
- Make sure them small one e up to date lor needle and everyone mus gedeh flu vax.

Sign bor this sick when em effect you?
