

## Musculoskeletal Physiotherapy Screening Clinics & Multidisciplinary Service (MPSC & MDS)

Your highly trained physiotherapist has recommended you for **non-surgical treatment** for your condition by our multidisciplinary team.

### Our team

Your **highly trained physiotherapist** will look at your overall progress and work with you on a treatment plan. You may have future review appointments with the highly trained physiotherapist as required.

You could be referred to see one or more of our **allied health team**. You may have appointments with them as long as needed. They will work with you and with each other to help you manage your condition and plan how to manage it in the future.

A **physiotherapist** will work with you to start exercises and treatment for your condition.

A **psychologist** will work with you to help you manage your physical and emotional health.

A **dietitian** will work with you to help you with your diet and lifestyle.

An **occupational therapist** will help you engage with your day-to-day tasks affected by your condition.

A **pharmacist** will work with you to help you best manage your medications.

If you have any **questions** or would like further information, scan the QR code or please contact:
