

Introduction to Clinical Research Principles 2018

Planning Analysis when Designing Research

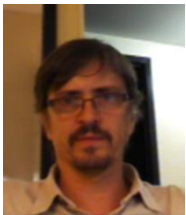

Tuesday, 17 April 2018, 12:30pm - 1:30pm

A light lunch will be available from 12:00

Ground Floor Large Meeting Room, North Lakes Health Precinct

Content material – The benefit of forward thinking in research design, types of statistical tests, when to use different statistical methods and an overview of how to do power calculations to estimate group sizes

Dr Gunter Hartel

- Head of the statistics unit at QIMR Berghofer.
- He is a Biostatistician with more than 25 years of experience in industry and academic settings, including 15 years with CSL Limited where he worked with scientists in laboratories and production, from basic R&D, through translational science to all phases of commercial clinical development, heading a global biostatistics department completing over 100 clinical trials and achieving registrations with the TGA, FDA, EMA, PMDA and other global regulatory agencies.
- Prior to his CSL career, Gunter held academic posts in both the US and Australia, including UQ and QUT.

Register by COB Thursday, 12 April 2018

Please use the online registration form available from the MN Research webpage
