

Common challenges in primary care education series

General genetics for GPs

Tuesday 12 February 2019

Join us for an education evening exploring common problems seen in general practice involving genetics.

This is the first of two education evenings exploring common problems seen in general practice involving genetics. Genetics and genomics is a rapidly expanding field and it is important that GPs are aware of new developments so that they may identify suitable patients for referral and understand how to supply suitable advice if referral is not necessary. There will be opportunities to network with a local Clinical Geneticist and to ask specific or case related questions so bring these questions with you to the meeting.

Program	
6:00 pm - 6:30 pm	Dinner and networking
6:30 pm - 6:45 pm	Welcome and GPLO update <i>Dr Mike Hamilton GPLO Brisbane North PHN & Metro North HHS</i>
6:45 pm - 8:15 pm	General genetics for GPs <i>Dr Chirag Patel – Consultant Clinical Geneticist/ Co-Lead for Queensland Renal Genetics Program</i> <ul style="list-style-type: none"> • basic genetics (101) • genetics in primary care • clinical genetics service • genetic testing • reproductive genetics • ethical, social and legal issues.
8:15 pm - 8:30 pm	Q&A session <i>Please bring along your clinical case or service based questions</i>
