

# Right Patient, Right Treatment

Metro North Health

When you are a patient you get asked a lot of questions:

- What is your full name?
- What is your date of birth?
- What is your allergies?
- What is your gender?
- What is your address?
- What are you here for?
- Do you consent to this treatment?

We ask these questions to make sure the right person gets the right treatment.

Multiple staff might be involved in your care. Therefore, different staff may ask you the same questions to make sure everything is correct.

Please speak up and let us know if any of your details is incorrect or has changed. This includes:

- New allergies
- Change of address
- Incorrect spelling of your name
