

HERSTON HEALTH PRECINCT SYMPOSIUM 2022

Connections and Community

5 - 8 September 2022

Education Centre
Royal Brisbane and Women's Hospital

WELCOME

I am excited to introduce you to the program for the 2022 Herston Health Precinct Symposium.

Over four days, the program will cover equity and access to innovative clinical care and research, models of collaboration, involvement of consumers and new ways to connect clinicians, researchers and community through technology, in addition to providing an update on the state of the art across the whole spectrum of health care. We will examine how connections between acute, subacute and aged care have been remapped by the pandemic (see the Monday Keynote from Professor Kathy Eagar) and look to the future of clinical trials in the post-pandemic world.

As in previous years, the program will feature a daily keynote lecture, multidisciplinary and educational sessions, free abstract presentations, emerging methods and technologies and a Grand Round on the topic of palliative care and voluntary assisted dying.

The Symposium will again adopt a hybrid format so that clinicians can view sessions from their workplaces. However, I would encourage you to take advantage of the opportunities to learn network and build connections with colleagues by attending in person. For further details keep an eye on the Symposium website (<https://metronorth.health.qld.gov.au/events/herston-healthcare-symposium>) and look out for a link to register via Eventbrite.

See you soon!

Professor Michael O'Sullivan
Director Research and Implementation
RBWH Research Services

Monday

Welcome to Country

Health and Research Equity - Research Alliance for Goori Health

Keynote: The interface between acute care, subacute care and aged care: value based care and lessons from COVID

Debate: Humans vs Machines: Clinical Decision Making in 21st Century

The allure and challenges of innovation in trauma care – Jamieson Trauma Institute

Tuesday

Single cell transcriptomics in health care

A practical guide to statistics in medical research

Keynote: Spiders, Venoms and therapeutics

Scientific Session : Free Abstracts

Wednesday

Theranostics, Novel Radiopharmaceuticals and Cancer

A practical guide to health economics

Keynote: In-hospital CAR T cell manufacturing – high tech meets cottage industry

Genomics Application in Practice – Genomics Institute

Establishing the Institute's Impact – Herston Infectious Diseases Institute

Thursday

Consumer and Community Engagement

How to do it : getting consumers involved

Keynote: The future of clinical trials

Herston Grand Rounds – “A time to die”

Open Research Forum

Navigating discovery advances, clinical translation pathways and regulatory reforms for the 3D printing of patient-matched devices – Herston Biofabrication Institute

Symposium Award Presentation and Reception
