

## QUT Metro North Nursing and Midwifery Academy

# Research Intern Scholarships

Undertake a one-year research project working collaboratively with QUT nursing research mentors. Scholarships fund each registered nurse/midwife a 12-month internship program that includes one research day per week at your substantive classification.

We welcome applications from nurses/midwives with innovative questions or ideas for practice development, who have no or some research experience.

### Watch previous interns share their stories here

*If there's a change you want to make, but don't know how to put it into action—apply for the internship. You will learn and grow so much in the process. Share your idea and give it a go! – Emma O'Brien, Registered Nurse, TPC*

*It is a great opportunity to improve practice, especially something you are passionate about. You will learn so much about yourself, and inspire others around you to be passionate about their own practice – Yashni Kander, Nurse Navigator, RBWH.*

*I definitely encourage anyone to do it. The support and opportunity to learn research skills and lead a project that focuses on something you feel directly impacts patients and nurses. This is a great opportunity to be able to do this and build relationships with others in the research space – Kylie Jacobs, Nurse Educator, Redcliffe Hospital*

Complete an online application by 30 September 2023 at: <https://metronorth.health.qld.gov.au/research/grants>
