# WELCOME

I am excited to introduce you to the program for the 2023 Herston Health Precinct Symposium.

Over four days, the program will cover digital health, advances in models of disease, advances in cardiovascular health, the growing challenge of obesity and the future of cancer care in Queensland. We will examine innovation across the whole of the healthcare journey, from the roots of ill health in childhood (keynote by James Scott) to the use of new technology to adapt and recover from illness in later life. We will also debate how our healthcare system, and its focus on hospital beds, needs to be reconfigured for the needs of the future.

As in previous years, the program will feature a daily keynote lecture, multidisciplinary and educational sessions, free abstract presentations, emerging methods and technologies and a Grand Round on the topic of infection, following a keynote lecture on the search for solutions to emerging superbugs.

The Symposium will again adopt a hybrid format so that clinicians can view sessions from their workplaces. However, I would encourage you to take advantage of the opportunities to learn network and build connections with colleagues by attending in person. For further details keep an eye on the Symposium website (<https://metronorth.health.qld.gov.au/events/herston-healthcare-symposium>) and look out for a link to register via Eventbrite.

See you soon!

Professor Michael O'Sullivan  
Director, Research and Implementation  
RBWH Research Services

## Thank you to our partners

## Thank you to our presenting sponsors:

The University of Queensland  
– Institute for Molecular  
Bioscience

National Centre for  
Neuroimmunology and Emerging  
Diseases, Griffith University

Due to COVID 19 social distancing requirements, in person attendance at the Symposium is limited. Anyone wishing to attend sessions will need to register via Eventbrite. Please go online to Metro North Events page and scroll to the Herston Health Precinct Symposium, or scan the QR code (back page).

Once registered via Eventbrite, Zoom links will be emailed to you for each session. In person attendance will be a 'first in, first served' basis until our maximum allowed capacity is reached.

We look forward to you joining us.

For further details, please telephone +61 7 3647 1008 or email [Herston-Symposium@health.qld.gov.au](mailto:Herston-Symposium@health.qld.gov.au)
